

PAVONElive Workflow

Efficient processes from the cloud

Businesses are increasingly recognising that the most important factor in the competitiveness of their products and services is the efficiency of their processes. The PAVONElive solution is designed to meet this very requirement. PAVONElive uses workflows to efficiently automate your processes, leaving you free to focus on your core business. Process modelling, management, implementation and controlling are all handled by the same solution, which delivers powerful functionality to ensure efficient and proven workflow implementation.

Move into the fast lane with PAVONElive

PAVONElive is a SaaS solution that gives you control of your processes. It delivers continuously available, scalable resources over the Internet at predictable costs. As a result, you can coordinate your processes, save time and augment the quality of the information on which you base business decisions. PAVONElive comes with a set of predefined workflows that can be quickly and easily adapted to your individual requirements.

Ideal for SMEs

The unrivalled combination of user-friendliness, high performance and transparent costs makes this application especially attractive to small and medium enterprises. It delivers the benefits of minimal administration, flexible services and straightforward integration.

Process management with a single solution

PAVONElive includes all the tools you need for easy, efficient and cost-effective handling of your processes.

- Graphic workflow modelling with simulation and animation functions
- Integrated form designer with web interface
- Automatic e-mail notification
- Predefined workflows that can be individually adapted
- Range of evaluation functions for easy controlling
- Interfaces to import and export XML and CSV files
- Compliance with legal requirements

Workflow with PAVONElive

How do I benefit?

- Intuitive Web 2.0 user interface
- Immediately ready for use – no installation required
- Collaboration protected by maximum security standards
- Predefined, customisable workflows
- Graphic workflow modelling with simulation
- Cross-platform solution: Available in the cloud or on-premise

Make your processes future-fit with PAVONElive – from process design to everyday use and controlling

Process design

- Graphic representation of processes delivers more transparency.

Everyday use

- Preconfigured workflows can be used out-of-the-box to facilitate your day-to-day work.

Controlling

- Keep track of related costs and resources so you can measure your success.

About PAVONE

PAVONE AG is the division of GBS Enterprises devoted to business process optimisation. Our core competency lies in the seamless integration of workflow management, project management and CRM applications.

Customers

PAVONE customers benefit from the experience we have garnered from over 315 000 installations in more than 2500 projects. Our customers include high-profile companies such as Landesbank Baden-Württemberg, Electrolux Home Products, KDZ Wiesbaden, Ferrostaal Industrieanlagen GmbH and Fürstlich Castell'sche Bank.

The benefits at a glance

Security always comes first – Modern security and data protection mechanisms satisfy the highest standards.

Work without boundaries – With PAVONElive you can collaborate across groups and even across companies.

No installation or administration required – The solution can be used immediately after registration. This means no administration costs.

Lower costs – With PAVONElive you only pay for the services you use, with no hidden costs.

Profit from the other components of PAVONElive

Activity management: Organise individual and team activities quickly and easily. This reduces your workload because all the relevant information can be supplied as part of an activity.

Document management: Manage different versions of your documents centrally using your browser, Microsoft Office environment or Windows Explorer.

Project management: Manage project schedules, documents, reports, addresses and all other key project information with PAVONElive.
